

COLLECTOR STREET NETWORK

**PUBLIC MEETING
The Spratt Building
215 Main Street, Fort Mill, SC
Thursday, October 6, 2016
6:00 PM to 7:30 PM**

Please come to a public meeting to learn more about efforts to reduce traffic congestion by strengthening the collector street network. The transportation system is made up of different types of roads that serve different functions, and collector roads are important links that help people move around more efficiently. As the region continues to grow, keeping a focus on these critical connection routes will be an important part of reducing / minimizing long term traffic congestion. The communities that comprise RFATS include the cities of Rock Hill and Tega Cay, the Town of Fort Mill, the Catawba Indian Nation, the eastern urbanized portion of York County, and the panhandle of Lancaster County.

Meeting Format

The meeting will include a brief presentation on Collector Streets and include area maps for review and discussion.

**For more information concerning this meeting,
please contact David Hooper, RFATS Administrator at 803-326-3897.**

"RFATS is committed to assuring accessibility, with reasonable accommodation, of its services, facilities and programs in compliance with Federal law." Please contact RFATS staff at (803) 326-2460 if you need assistance.
